-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings filed October 21, 2003 are objected to because all boxes in the drawings should have descriptive legends attached to them. Therefore Figures 2a, 2b, and 2c should be labeled.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5, 7-10, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Rittenbach ('812 or '655).

The claims are considered to be met by Rittenbach ('812 or '655) who discloses at least, inter alia, a sensor system for detecting an object including a signal source (phase modulator 28), an antenna system (10), and an information processor (computer 22). The Rittenbach ('812 or '655) clearly show I/Q processing.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rittenbach ('812 or '655) in view of Lewis et al ('478).

The invention is substantially disclosed by Rittenbach ('812 or '655) who disclose an object sensor system including, inter alia, a signal source, an antenna, and a processor. However, it appears that Rittenbach ('812 or '655) do not show providing a band pass filter.

Although bandpass filtering is well known in the radar art, Lewis et al ('478) is applied to show band pass filtering in a radar system (see bandpass filters 73 and 74 in Figure 10). The bandpass filter is well known for isolating desired signals within a specified frequency band.

Thus it would have been obvious to one of ordinary skill in the art to provide a bandpass filter for the radar system of either Rittenbach ('812 or '655) as taught and as motivated by Lewis et al ('478) in order to process the radar returns to detect an object or target of interest.

Allowable Subject Matter

6. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 11-18 are allowed.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B. Sotomayor whose telephone number is 703-306-4170. The examiner can normally be reached on Monday to Friday from 8:30AM to 5:00PM.
